

SCS series

Soundproof Compressor System

SILENT PISTON AIR COMPRESSORS

The silent piston compressors of the new SCS series have been designed with the aim of developing simple machines with easy maintenance.

The main characteristics of the new SCS series are:

- Reduced number of special components.
- Same performance levels.
- Reduced temperature internally and at the air outlet.
- DOL start up with ON/OFF push button.
- Operates with a pressure switch with amperometric relay and overload protection also for versions without air receiver.
- Housing in steel plate insulated with sound proofing material.
- S1 electric motor.
- Two stage pumping unit for pressure up to 14 bar.
- Hour meter.
- Pressure gauge also for versions without air receivers.
- Reduction of maintenance costs.

Model								OUTPUT
