

SATA® vision™ 2000

German Engineering

Breathing Protection Your Health is Our Concern

Head/chest cover with velcro closure; breathable, solvent-resistant, lint-free and flame retardant.

Adjustment screw allowing to fix the visor.

Sweat band made of microfibre velour, dermatologically tested; easy to replace to ensure highest hygiene standards; with foam insert for enhanced wearer comfort.

Special single visor foil to prevent reflections and distortions leading to colour deviations; quick and easy to exchange.

Breathing air hose with sound adsorber for fresh air supply.

Individually adjustable head strap to allow greater wearer comfort.

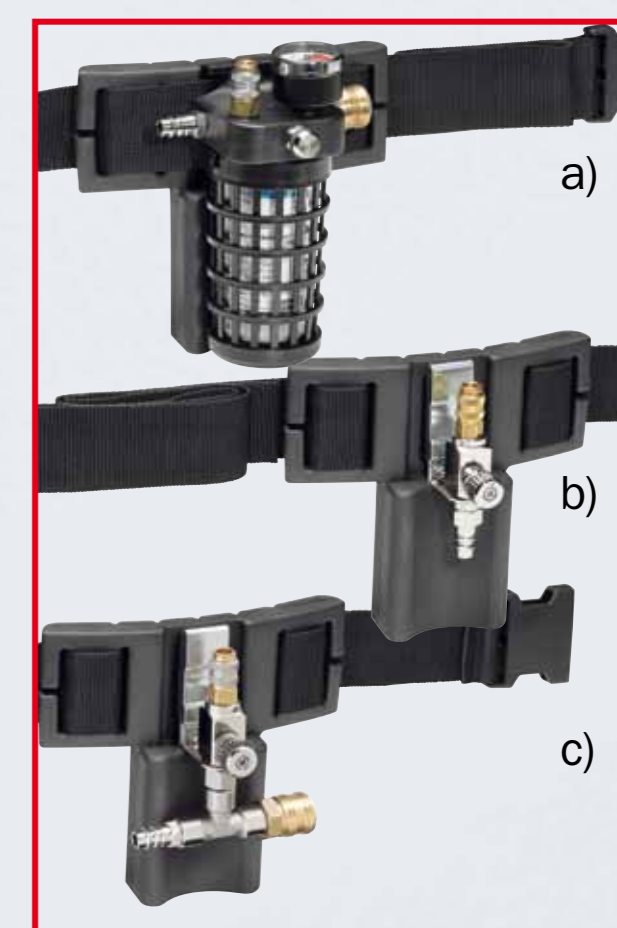

Lightweight, robust, liftable visor.

Hygienic quick exchange hood inlays.

Safety whistle: acoustic warning signal in case of insufficient air supply.

■ SATA® Belt Units

Adjustable and cushioned; a) with activated charcoal adsorber to provide breathable air quality. b) Industrial belt unit and c) Belt unit with T-connector both without activated charcoal adsorber; to connect to three-stage filter regulators incl. an activated charcoal unit, e.g. SATA filter 484.

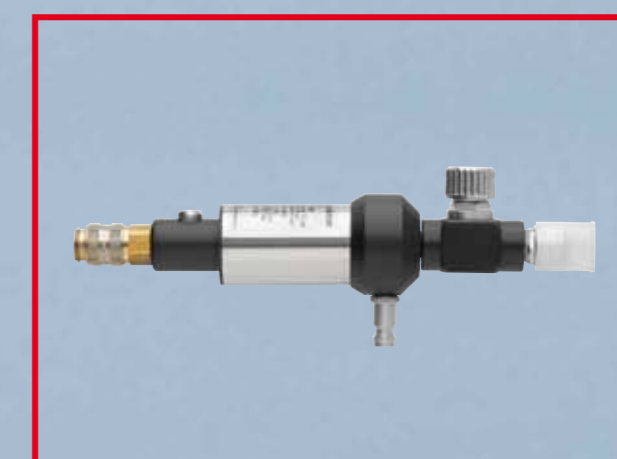

■ SATA® top air™

Breathing air humidifier for a comfortable breathing climate, attaches to the belt unit.

■ SATA® air warmer

Adjustable breathing air warmer to increase the temperature by max. approx. 10° C, attaches to the belt unit.
