Film4Booth | new

Colad Film4Booth is a transparent, 4 layer Self-adhesive protection film.

Watch Video:
bit.ly/SWVii1

- The smartness of this film is that 4 layers are attached to each other by a thin layer of glue.
- Each layer is numbered, from high to low. The top layer is number 4, the base layer is number 1.
- In a split second you can see how many layers are left at the cabin-wall.
- Using the applicator and dispenser makes this job simple, even a child can do the job!
- If a layer is dirty, simply pull off the layer (without any tools or help), use the supplied edge tape to seal the edges and the cabin is ready for the next paint-job!
- In a short period you can cover your cabin completely.
- The film is suitable for all surfaces: walls, armatures, doors and windows.
- No more water in the cabin, the perfect dry system!
- No loss of light and paint-adhesive.
- A solution for the maximum of one year, no need to repaint the cabin by using Film4Booth!
- The best and most simple solution to retain a new cabin forever!
- Perfect solution in combination with Antidust.
- Packed per roll of 90 cm x 84 mtr in a carton incl. 6 rolls of edge tape.
- Costs per sqm below € 2,50.
- Available now at your paint supplier!
