1K Blending Thinner

TDS No.: 4451 EN // TDS Date: V1-09.08.2010

Product	1K Blending Thinner	
Colour	Transparent	
Product description	Generally applicable for spot blending of 1K and 2K clearcoats or topcoats. Ensure that the overspray will blend into the transition zone and leaves no visible difference between the old and new paintwork which reduces the polishing work.	
Use for	Spot repairs	
Base of binder	Special resin	
Temperature resistance	Up to 90 °C	
Application	Apply clearcoat or topcoat to the blended area immediately after application. Matt the substrate in the transition zone generously with an abrasive pad P2000 - P4000.	
Size	400 ml	
VOC	283,8 g	
Storage stability	10 years Store in a dry place and away from sunlight (10 °C-25 °C). Maximum air humidity 60 %.
