

GIJG-1TW

Infrared Curing Lamp

The Redashe GIJG-1TW Infrared Curing Lamp is the perfect addition for any paintshop looking to provide a high quality finish while saving money at the curing stage. Equipped with both a detachable handheld lamp and lockable wheeled stand, most locations are within reach.

This light is very easy to use with its simple mechanical timer allowing for the light to be put into immediate use without setup. Supported by a powerful 1000 watt lamp, primer and top coat can be cured in just minutes. The main lamp body is made of a lightweight aluminium alloy with the stand column being finished in stainless steel.
