

GIJG-3CW

Infrared Curing Lamp

The Redashe GIJG-3CW Infrared Curing Lamp is the perfect addition for any paintshop looking to provide a high quality finish while saving money at the curing stage. This light is equipped with a gas assisted pivoting arm and easy to use handle to move the lamp into position over a roof or bonnet.

The 3CW is fully equipped with both distance and temperature sensing, giving full control of the curing process ensuring a perfect finish.

This light comes with a easy to use soft touch display panel that allows for 5 fixed programs, full bake, and a flash off feature to ensure all solvent has been released before fully curing the paint.

The soft touch digital display allows control of both power and time, giving flexibility for paints and putties. Supported by three powerful 1000 watt lamps that are fully adjustable enabling primer and clear coat to be cured in just minutes.

All 3 individual lamps are adjustable, perfect for curing around a wing or curved bonnet.
