

RDI4C / RDG4C Ace Quattro

This spray gun cleaner is the perfect addition to any bodyshop looking for a very high volume, easy to use solution for both solvent and water based spray guns. This machine is equipped with automatic wash areas for both solvent and waterborne detergents that can be started and safely walked away from. Pairing this with two manual wash basins giving the ability for very high volume cleaning capacity of four guns at a time. This machine is perfect for both production lines and bodyshops with a high volume of cars flowing through.

FEATURES:

- Automatic wash facilities for both solvent and waterborne solutions, solvent and waterborne re-circulation and automatic clean rinses.
- Fully equipped duel wash basins with flow through wash brushes, clean rinses and an air gun, all easily controlled with foot pedals and triggers.
- Available in both stainless steel (RDI4C) and powder coated (RDG4C).
- Lifetime pump warranty.
- Optional manual waterborne wash basin lid.
- Compatable with docking station and solvent recycler for additional efficiency.
